President’s Report
by Thomas Mack

It’s that time again…the 43rd Annual Meeting of Shareholders is right around the corner. This year we are celebrating our theme Keeping Culture Alive in honor of our many culture camps. The first one was held in Unalaska in 1997 and now many of our communities come together to share traditional knowledge of Aleut art, culture, traditions and history. Activities include dance, basket weaving, bentwood visor construction, kayak construction, drum making, traditional foods, head dress and regalia sewing, carving, language, history and storytelling.

The two-day Aleut Villages Conference on October 8 and 9, Culture Night on October 9, the Annual Meeting and Banquet on October 10 will all be held at the Egan Center. This year the Akutanam Akasniikangin dance group from Akutan will perform Friday night and again during the Annual Meeting on Saturday.

New to this year’s series of meetings and events is our first Career Fair named Awan Unangam Quliiq “Jobs for Aleuts.” The purpose is introduce our shareholders and descendants to career and training opportunities. TAC’s subsidiary companies, Aleut businesses, other regional organizations, training and educational groups will be at the Egan to:

- Share educational / training opportunities.
- Showcase internships and jobs available
- Provide shareholder networking opportunities with potential employers.

I hope you will take a few minutes to visit the booths and sign up for three great prizes.

I am happy to report that…our subsidiary companies have won some significant contracts.

Here’s a brief business update. This last year has been a year of transition and growth for the Aleut Corporation. By now you have received the Special Edition of the Aleutian Current and the 2015 Annual Report. I am happy to report that even in the short period of time since those were mailed out, our subsidiary companies have won some significant contracts. Aleut O&M Services, LLC (AOMS) of Colorado Springs, has been awarded a $395 million contract to provide Cape Canaveral launch operations and infrastructure support. ARS in Port Allen, Louisiana has also been awarded several large contracts. Everyone from the Board of Directors to our over 800 employees has been working hard as we return our company to profitability.

I look forward to seeing you and your family at the Egan Center in the next few weeks. If you can’t attend I hope you will watch the webcast of Culture Night and the Annual Meeting. A list of all the events are provided in this newsletter and on our website at www.aleutcorp.com.
CEO’s Report
by Matthew Fagnani

Where did the summer go? Here in Alaska we pack in a lot while fishing, hiking and boating during our short 100-day season. This summer at the Aleut Corporation though, it was not all about fun. It was about hard work and dedication to winning government projects. I am pleased to announce that we did win some very lucrative bids.

Aleut Management Services (AMS), our subsidiary in Colorado Springs, CO, and its subsidiary Aleut O&M Services, LLC. (AOMS), had one of their largest wins in the history of the company. AOMS received a $395 million dollar award through the US Air Force to provide services and infrastructure support at Cape Canaveral Air Force Station. AOMS is the prime contractor and will work with its partner PAE Applied Technologies, LLC to provide these services to the Air Force. Join me in saying congratulations.

That’s not the total picture. AMS and ARS International (our subsidiary company based in Port Allen, LA) added over $100 million in additional awards.

It has been a winning summer at the Aleut Corporation.

- ARS’s mid-summer RADCON award of $55 million to provide onsite radiological services to a nuclear facility in Oakridge, Tennessee.
- ARS also added another $8 million in sole source government contracts.
- AMS added an additional $46 million with 16 other awards.

That’s a total of $500 million (half a billion dollars) in new awards since April 1.

These recent wins are important because they reflect improvements to the overall corporation, while beginning a new era of growth. Equally as important, these wins will make a difference in our overall profitability.

When the Board of Directors brought on TAC’s new management team it was with the expectation that we would return the Aleut Corporation to profitability by evaluating our subsidiaries and working with them to develop strategic plans for recovery. Doing so, we were able to make improvements in each of their performances.

Our next step for the remaining months of this fiscal year is to focus on improving the return on investment.

It is important to keep in mind that changing a company’s performance is like turning a large ship. It takes time to change direction and make meaningful changes. I am very pleased with our progress thus far and I am confident of continued success. As we look toward the 2017 fiscal year we will focus on improving gross margins within each new project we win, so that we can improve our overall net profits. In the coming months we will begin our strategic planning and budget process. I am looking forward to working with the Board of Directors on this. Their insight is crucial as we continue our growth.
Chair Report
by Dick Jacobsen

As we are preparing for the Aleut Corporation’s 43rd Annual Meeting of Shareholders on October 10, I want to take this opportunity to encourage you to vote your proxy. Hopefully you have received your Annual Report, Proxy Statement, and Proxy for 2015. If you did not, please contact the Aleut Corporation to ensure you receive these important documents.

Shareholder input in the voting process helps us to develop the priorities for the next year and energizes our TAC Management Team and Board of Directors. Please share your thoughts at the upcoming Annual Meeting or email your ideas to us.

I look forward to talking with many of you at the Annual Meeting and throughout the year. Please feel free to contact the Board of Directors with your questions and comments at TACdirectors@aleutcorp.com.

BOARD ACTION ITEMS:

• Approved the Shareholder of the Year
• Approved the Student of the Year
• Authorized management to hire a full time Fisheries Resource Specialist for TAC.
• Directed management to solicit cost estimates for a structure evaluation on the building in Adak.
• Adopted TAC Board Resolution 08-2015; a resolution supporting efforts for implementation by the responsible federal parties of the “Aleut Tribal Policy for restoration of federal sites in the Aleutian and Pribilof region”.
• Directed management to explore divestiture and other alternative investment options for the Valdez trailer park.
• Approved to the City of Akutan a right-of-way easement for access from the City of Akutan to the boat harbor.

Door Prizes!

Awan Unangam Quliin
Jobs for Aleuts

Saturday, October 10, 2015
8:30 a.m. – 3:30 p.m.
Egan Center Lower Level | Summit Hall
Anchorage

Join us at our Annual Shareholder Meeting to learn education, training, and great job opportunities available throughout the Aleut Corporation and its subsidiaries, as well as other job opportunities throughout Alaska and the lower 48.

Don’t miss out. See you there!

ALEUT VILLAGE CONFERENCES: All shareholders are welcome.
Thursday, October 8 & Friday, October 9
9:00 AM to 5:00 PM
Street level – Cook Rooms

- Village Reports
- Introduction of Board Candidates (2 mins each)

Shareholders meet at the Aleut Village Conferences to review shareholder resolutions and to discuss topics currently affecting our communities and shareholders.

CULTURE NIGHT:
Friday, October 9
6:00 PM to 8:00 PM
Street level – LaPerouse Room

- Hors d’oeuvres will be served at 5:45 PM
- Culture Camp Presentations
- Shareholder Awards
- Dance Performance by Akutanam Ašasniikangin dance group

AWAN UNANGAM QULIIN – JOBS FOR ALEUTS:
Saturday, October 10
9:00 AM to 3:00 PM
Lower Level – Summit Hall

- Career Fair
- Education and training opportunities

ANCHORAGE, ALASKA – This fall, two Alaska Native Science & Engineering Program (ANSEP) alumni will make history at the University of Alaska Anchorage (UAA) as the first tenure-track Alaska Native engineering faculty members. Both Michele Yatchmeneff and Matt Calhoun recently earned their doctorates in engineering and will begin teaching engineering courses during the fall semester of 2015 to develop the next generation of STEM industry professionals in Alaska.

“We’re proud of how far Michele and Matt have come,” said ANSEP Founder and Vice Provost Dr. Herb Ilisaurri Schroeder. “They exemplify the ideal ANSEP students. Their experiences, first as students and later as staff, speak volumes about the long-term impact ANSEP can have and also make them uniquely qualified to encourage other Alaskans to pursue STEM education and careers.”

Dr. Yatchmeneff is a Unangax (Aleut) woman who grew up living a traditional subsistence lifestyle in rural villages along Alaska’s Aleutian chain. She discovered her love of engineering in high school while attending an engineering camp at the University of Denver, and began to immerse herself in several camps and internships. While working toward her undergraduate degree at UAA, Yatchmeneff participated in the ANSEP University Success component. After earning her bachelor’s and master’s degrees in engineering at UAA, she began working in Alaska’s construction and engineering industry, specializing in water and sewer projects in remote villages across the state. Throughout her school and work experiences, Yatchmeneff felt that there was an ongoing negative stereotype that came with her Alaska Native heritage. As a result, she returned to ANSEP in 2007 as deputy director, with the goal of motivating other Alaska Native students to earn STEM degrees and join her in combating those stereotypes. Yatchmeneff recently earned her Ph.D. in engineering education from Purdue University.

“ANSEP students inspire me every day because they are knocking down barriers they don’t even realize exist,” said ANSEP Assistant Professor of Engineering Yatchmeneff. “I’m looking forward to helping students learn to navigate the university and getting them excited about their undergraduate engineering degrees.”

Calhoun is an Athabaskan Indian from Homer, Alaska, and has been involved with ANSEP since 1999. After meeting ANSEP Founder Schroeder, Calhoun was inspired to pursue an engineering degree at UAA while participating in the ANSEP University Success component. In 2002, he was one of the first ANSEP students to graduate with his bachelor’s degree in civil engineering. From there, Calhoun was employed as a project engineer for three years before returning to ANSEP as a regional director in 2006. Calhoun actively recruited students for ANSEP pre-college components before going outside to earn his master’s in civil engineering from the University of Colorado at Boulder in 2010. This year, Matt earned his Ph.D. in civil engineering from the University of Alaska Fairbanks.

“I truly believe Alaska needs more homegrown scientists and engineers, and I want to be part of making that happen at ANSEP and at UAA,” said ANSEP Assistant Professor of Engineering Calhoun. “Having more Alaska students with degrees is key to having a voice in the projects and research that will build Alaska’s future.”

Both Yatchmeneff and Calhoun are now tenure-track faculty members at UAA. During the fall semester, Yatchmeneff will teach Introduction to Engineering as well as two sections of Engineering Economic Analysis and Operations. Calhoun will teach Introduction to Engineering as well as Properties of Materials and its corresponding lab. The two will also continue their work at ANSEP, serving as assistant engineering professors to Dr. Schroeder.

ANSEP’s longitudinal model begins at the middle school level and continues through high school and into college undergraduate, graduate and doctorate programs. Yatchmeneff and Calhoun are among 146 ANSEP scholarship recipients that have graduated from the University of Alaska with bachelor’s degrees in STEM fields. There are currently more than 1,500 students in the ANSEP pipeline.
The Aleut Corporation has launched a new website, www.portofadak.com, showcasing the importance of the Port of Adak’s strategic location and unique capabilities. The deepwater port is accessible year round because unlike most other ports in Alaska, the Port of Adak remains ice-free.

The port’s close proximity to the Arctic makes it a vital tool for a diverse group of Alaska industries, which include transshipping, oilfield services, offshore companies, and fisheries. The Port of Adak website is the source of information for industry leaders.

“We are thrilled to launch this new site. We see some one-of-a-kind opportunities on the horizon for the Port of Adak,” said Matthew Fagnani, Aleut Corporation CEO. “The Port of Adak is a true gateway to the Arctic. An investment in the Port of Adak is an investment in the future of Alaska’s most valuable and productive industries.”

The new website is a testament to the bright future the Aleut Corporation envisions for the Port of Adak. Currently the corporation is forming new partnerships with industry leaders, as it positions itself for the future of offshore oil and gas exploration projects and expansion to arctic shipping routes.

Aleut Corporation Launches New Port of Adak Website

We are excited to announce that one of our shareholder employees, Shaun Stark, Warehouse Manager at Alaska Instrument Company (AIC) has been accepted into the Alaska Native Executive Leadership Program at Alaska Pacific University with Aleut Corporation as his sponsor. Shaun will participate in the program from September 2015 through May 2016, studying multiple facets of executive leadership including topics such as communication, budgeting and planning for sustainability and growth, performance metrics, government contracting, and strategy development.

The Aleut Corporation currently stands at 762 employees with 61% of our corporate office made up of shareholder and descendant employees. Looking at our businesses based in-region and Anchorage, where a large percentage of shareholders reside, shareholders and descendants make up 45% of those employees. We continue to look for ways to connect qualified shareholders and descendants with career opportunities throughout the corporation.

Respected Unangan Elder, Alice Petrivelli Passed Away
On September 10, 2015 at the age of 85

Alice started her involvement in the Aleut Corporation in 1972 when she became a part-time receptionist. She served as a Board member from 1976 until 2008 and was the longest serving Board of Director of 32 years. She served as Chairman of the Board from 1987-88 and 1989-90 and Secretary/Treasurer in 2004. Alice was the fifth Aleut Corporation President from 1990 to 1996 and also the first woman President. She served on many boards and advisory committees in many capacities. Alice also served on the boards of the Native American Graves Protection and Repatriation Act, Alaska Native Heritage Center Academy, Aleutian Pribilof Islands Cultural Heritage Program Advisory, and as president of The Aleut Foundation as well as an advisory member. She was a board member on the corporation’s subsidiaries, Akima Corporation, Alaska Trust Company, and was TAC’s representative for the Alaska Federation of Natives.

Although retired, Alice was always happy to provide informal consulting on subjects of her knowledge and expertise.

Alice actively supported getting the younger generations involved in the Aleut Corporation. Taken from a board member profile done on Alice in 2003: Petrivelli makes a point of encouraging young people to get involved and is steadfast in her belief that TAC can only prosper if the youth take part.

“With the establishment of the Aleut Foundation we educate a lot of people,” she said. “I hope they learn to be engineers or administrators and come back to work for TAC or its subsidiaries.”

“Trust,” Petrivelli said, “is what shareholders value most. I like and respect my people and that means being up front always. I will always tell shareholders truly if something can or cannot be done. Sometimes we fail, but mostly we make a difference in maintaining the profitability of the Corporation.”
The Aleut Foundation Update
by Cynthia Lind, Executive Director

Aang Aang! We had a wonderful summer this year and I hope everyone had a great summer as well. Now, we are busy focusing on the fall and more importantly, the upcoming school year.

The Annual Aleut Picnic was held June 20 at the Aleut Corporation's office grounds. This was our second year that the picnic was held on a Saturday and we were thrilled to have beautiful weather and a lot of shareholders and descendants in attendance. I even thought we might run out of hamburgers and hot dogs but thank goodness we didn't. The picnic was held in conjunction with the closing ceremony of the APIA Urban Unangax Culture Camp. Millie McKeown, Cultural Heritage Director, brought over the youths who performed dances. Culture Camp attendees also provided fish pies and needless to say, they were the first to go. We would like to thank Dr. Gary Ferguson, TAF Co-Chair, for the wonderful job he did as Emcee!

The Aleut Foundation sponsored 39 people to attend the culture camps this summer which is more than last year! Those attending were: APIA Culture Camp – Miles Bourdokofsky, Patrick Dushkin and his children Grace, Logan and Brody, Kristyn George, Edna Huwe, Mary Kelsay and her daughter Kelsay, Elaina Mack, Alexis and Evan Merculief, Geael Rukovishnikoff, Luke Shaishnikoff, Mataya Smith, Arnest Soc and Maxim Zacharof. Atka Culture Camp – Clarence Golodoff and his son Randy, Reign Galovin and her son Lucas, Aiyana Rich, and Makarius and Maiana Swetzof. Akutan Culture Camp – Safire Anderson and Chelsea and Paige Bereskin. King Cove Culture Camp – Brooke and Mallorie Wilson. Sand Point Culture Camp – Vega Britt, Jackie and Jayden Gronholdt, Jenny Kenezuroff and her granddaughter Misty Marine, Gabrielle, Tessa, Adin and Sari Williams. Unalaska Culture Camp – Michael Tutiaikoff and his daughter Matilda.

TAF also sponsored Anthony Lekanof who served as a summer intern with Alaska's United States Senator Lisa Murkowski. Anthony graduated this year from Mt. Edgecumbe High School and will attend Embry-Riddle Aeronautical University in Prescott, Arizona this Fall to study aviation. Anthony also participated in the Future Leaders Summit for the past three years.
I attended the PNAC Picnic last month in Seattle and met our shareholders and descendants who had questions about funding for post-secondary education, training and travel scholarships. Thank you to Julie Murphy for giving me the opportunity to speak about the Foundation programs and for the hard work that went into putting the picnic together.
